OBJECTIVE

Interested in becoming a software engineer, particularly in web development to apply knowledge and skills in HTML, CSS, JavaScript, PHP, MySQL, and their ecosystems. My goal is to continuously learn and grow in this industry, as well as contribute to developing innovative software solutions. I want to work in a competent and results-oriented team.

WORK EXPERIENCE

Full Stack Developer, PT Jejaring Tiga Artha (Zi.Care) | Jakarta, ID

Aug 2023 – Sep 2024, On-site

- Designed and developed a back-office system for a hospital using PHP and MySQL.
- Developed a hospital information system using the Phalcon framework and MySQL.
- Designed and developed internal tools using SvelteKit, Tailwind CSS, and Hono.
- Contributed to the data migration from MySQL to PostgreSQL.

Full Stack Developer Intern, PT Langgeng Sejahtera Kreasi Komputasi | Bandung, ID

Jul 2022 – Dec 2022, Hybrid

- Designed and developed a customized school website using Tailwind CSS, Next.js, and MongoDB.
- Designed and implemented an RFID-based attendance website using Tailwind CSS, Next.js, Express, and MongoDB.
- Designed and implemented a meeting management website using Tailwind CSS, Next.js, Express, and MongoDB.
- Provided teaching on Flutter and IoT at Wikrama Bogor Vocational High School as a guest teacher assistant.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Open-Source Maintainer, Bellshade

October 2021 – present, Remote

- Created learning materials about HTML & CSS.
- Created and developed open-source website templates using HTML & CSS.
- Reviewed HTML & CSS materials and website templates submitted by contributors.
- Created and developed the Bellshade CSS framework using SCSS.
- Contributed to the development of the OpenSeries.

Community Helper, WPU

October 2021 – present, Remote

- Assisted community members of WPU in resolving their issues, particularly in programming.
- Helped manage a community with over 50,000 members to create a positive environment.
- Conducted sharing sessions/webinars on programming to share knowledge.

Web Developer, Nisara

July 2023 – April 2024, Remote

- Performed slicing from designs into responsive and user-friendly websites.
- Built websites using the Laravel framework to achieve optimal stability, security, and efficiency.
- Regularly maintained the Nisara website, fixing bugs, enhancing functionality, and performing updates.
- Collaborated with the development and design teams to ensure alignment between website design and implementation.
